Score It by Domain

1. **Copy your answers into the grid below,** one letter (or two, for a "Choose two" question) per item. The domain tag beside each number tells you which domain the question tests. A "Choose two" question scores one point only if both letters are right.
2. **Mark it against the answer index at the start of Appendix B.** One point per question.
3. **Fill in the domain table.** Count your right answers in each domain, using the item numbers listed. Work out each domain's percentage.

The answer grid.

The domain table. Your right answers per domain, and the 75% line for each (the smallest count that reaches 75%). Chapter 9 explains what the line is for.

Domain	Items in this mock	Your right answers	Your %	75% line
D1 Prompting and Task Execution (8)	12, 15, 16, 22, 23, 24, 37, 46	___	___	6 of 8
D2 Output Evaluation and Validation (13)	1, 4, 13, 17, 19, 26, 29, 34, 35, 36, 45, 50, 57	___	___	10 of 13
D3 Product and Model Selection (7)	6, 9, 10, 39, 52, 53, 54	___	___	6 of 7
D4 Workflow Integration and Solution Design (10)	7, 11, 18, 25, 30, 32, 41, 42, 55, 59	___	___	8 of 10
D5 Configuration and Knowledge Management (7)	2, 5, 21, 31, 47, 56, 60	___	___	6 of 7
D6 Governance, Risk, and Responsible Use (9)	3, 27, 28, 33, 40, 44, 48, 51, 58	___	___	7 of 9
D7 Troubleshooting and Optimization (6)	8, 14, 20, 38, 43, 49	___	___	5 of 6
Total	**60**	**___**		**52 = go line**

Write two things at the foot of your cram sheet's front page now: your total out of 60, and your 7 domain scores in weight order. Then note your finishing time. If you went over 120 minutes, that is as important as any wrong answer.
